

ECMO Advantage is Now Part of Integration Health

For years, ECMO Advantage has been a trusted partner to hospitals seeking high-quality ECMO training, staffing, and program support. We are proud to share that ECMO Advantage and Innovative ECMO Concepts have unified under one name: [Integration Health](#).

This is more than a rebrand. It is the natural evolution of our mission.

One Company. Expanded Services. Greater Impact.

Hospitals told us they needed more than individual services...they needed a fully integrated partner across the entire extracorporeal care continuum.

Integration Health was built to meet that need.

As one unified organization, we continue to offer everything ECMO Advantage has always provided and more:

- High-fidelity ECMO education and simulation
- Experienced ECMO Specialist staffing
- Perfusion services
- ECMO transport support
- Comprehensive program development
- Cannulation and multidisciplinary training
- NRP (Normothermic Regional Perfusion) support
- Shock and broader MCS program support

By bringing ECMO and perfusion together under one umbrella, we've created a connected ecosystem of services designed to strengthen programs, support teams, and improve outcomes.

Built by Clinicians. Designed for Programs That Refuse to Compromise.

Integration Health is led by practicing clinicians with deep experience in:

- Critical care
- ECMO
- Perfusion
- Mechanical circulatory support
- Program operations

We understand the clinical, operational, and staffing challenges hospitals face because we've lived them.

Our commitment remains unchanged:

To empower the teams caring for the sickest patients and to help hospitals deliver advanced ECLS care without compromise.

What This Means for You

If you've partnered with ECMO Advantage before, you'll continue working with the same trusted educators, specialists, and leaders now backed by expanded capabilities and a broader national infrastructure.

If you're new to us, we invite you to explore everything Integration Health offers across ECMO, perfusion, NRP, shock, and advanced MCS services.
